Quick setup — if you've done this kind of thing before

Set up in Desktop

or

HTTP

SSH

https://github.com/katgit/segmentation.git

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

Create a new repository on the command line

```
touch README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/katgit/segmentation.git
git push -u origin master
```

Push an existing repository from the command line

```
git remote add origin https://github.com/katgit/segmentation.git
git push -u origin master
```
